Come Experience the ‘Manrique Difference’ Because It Matters Who You See!

At Manrique Custom Vision, we understand that each individual has specific needs when it comes to their eyes. Traditionally, doctors have used a handheld blade device to physically cut the corneal flap. However, we use a computer controlled **100% Blade Free Zeimer System**, that coupled with our perfect pulse technology **Alle-greto Wave® IQ Laser System**, guarantees each patient to achieve their best personal vision without glasses or contacts! The laser treatment lasts between 8-12 seconds per eye. In all, your LASIK procedure takes less than a minute to do both eyes. **Dr. Manrique is one of very few LASIK surgeons in the U.S.A. with this amazing technology and a certified trainer for this advanced procedure.**

For specific question, please feel free to contact
